Dariusz Kuriata

I'm in the process of making a career transition. After many years as a teacher I've decided to start learning something new. Recently I've been learning how to create websites and apps. I've finished Selenium WebDriver (Java) course as well as Sql for testers course based on Flask framework (Python). I'm also creating a responsive webpage. I've passed the ISTQB FL exam. I am determined to start a career in the IT world. I care about self-development, I am open to acquiring new skills and competences. I can start working ASAP.
